

## March Meeting

### MinnTS Annual Meeting Wearable Technologies

**This event has been CANCELLED.**

The MinnTS event coordinator will be sending an email to everyone that registered letting them know about the cancellation and will be refunding registration fees back to the credit card used for the registration. The event may be rescheduled to a later date but that has not yet been decided.

MinnTS is an annual joint meeting of area technical and scientific organizations. The first meeting was held in March 2003 and was sponsored by four participating groups: MMS, SEMI, AVS and ASM. By 2005 the number of participating groups had doubled to eight including the Mn Chapter of ACS. MinnTS was started for the purpose of providing a venue for local technical professionals to get together for networking, dinner, and technical presentations given by local experts. The speakers are deliberately chosen from the local area to avoid travel expenses and minimize costs for the participating organizations. In some cases speakers from outside the area have been able to combine an appearance at MinnTS with scheduled visits to area businesses. Because of the wide diversity represented by the sponsoring organizations, the speakers are chosen to present a range of general interest topics
